FABRIC AWNINGS

ECONOMICAL

Being a member of 'Fashionline' gives us national buying power and being a manufacturer means you can buy a complete range of home improvement products at Factory Direct Prices. We can custom design to solve all of your shading problems. We also offer an obligation free measure & quotation service.

FOLDING ARM AWNING

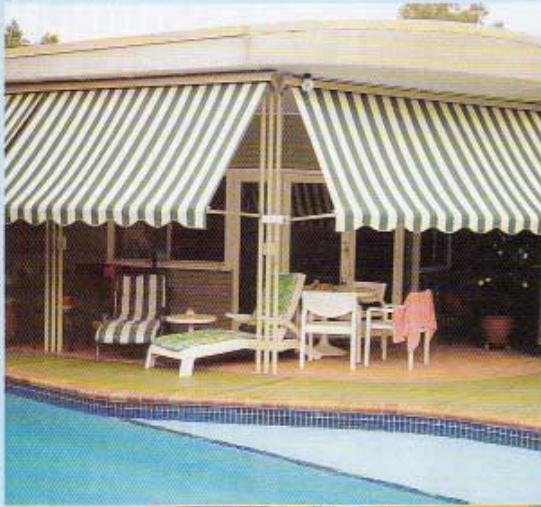

A beautiful home deserves a beautiful outdoor living area and a Folding Arm Awning achieves that by creating shady outdoor living space over patios, balconies or poolside. The engineered arms can extend to 3.6m without the need of support posts to intrude on your view. Easy push button control with a SOMFY electric motor, or fully automatic with a SOMFY Line sun and wind sensor controller.

For period style homes we provide ornate fittings in heritage colours to blend our products with your style.

Fashionline

—ROLL UP AWNINGS—

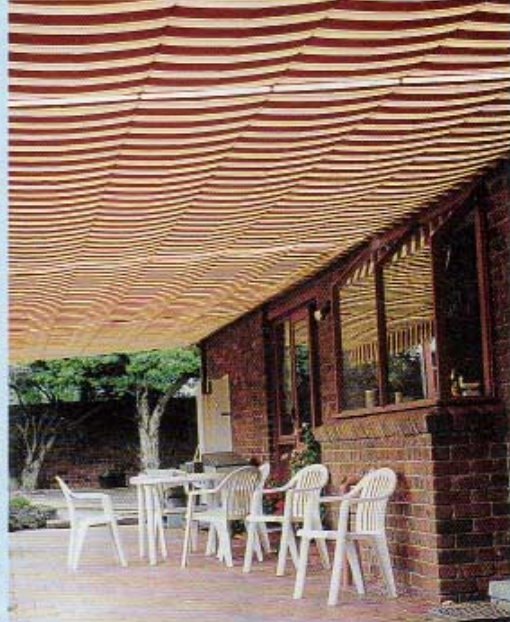

Block the sun's rays before they strike the window to prevent heat penetration.

We can offer you the widest range of styles, colours and fabrics in acrylics, mesh and canvas.

Control your shading automatically by motorising your awnings. Somfy motors allow you to control your awnings by way of sun, wind, temperature, rain or time controllers.

For difficult to reach windows, we can install awnings which allow for easy inside operation with a cord or winch operated.

New Sundream Fabric Awnings for patio covers, restaurants and roof covers for glass enclosures or pergolas. The Sundream System has been designed for maximum versatility. Each unit can be up to 30 (sqm) surface up to 6m wide.

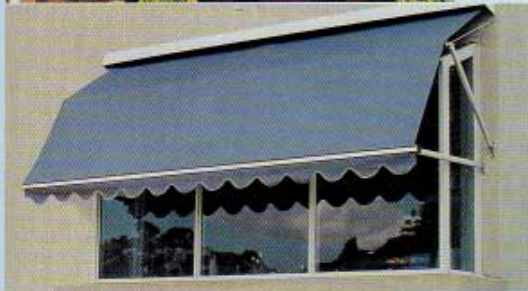

The Fashionline Patio Cover.

Extend your outdoor living areas and keep your house cool by installing a custom made **Patio Awning** to your pergola. Patio Awnings are easily retracted by cord and pulley and are designed to fold up under eaves. Great to install underneath Polycarbonate or glass coverings for those hot summer days.

SPECIAL CANVAS AWNINGS

Fashionline Fabric Awnings bring to you the elegance of style, protection and cooling so often required. Protect your valuable carpet and curtains from fading and from the worst effects of ultraviolet rays which break down many of the fibres used in them. It will protect valuable furniture from direct and reflected sun damage. It will save on costs by minimising the need for supplementary cooling. Probably most important of all, **Fashionline Awnings** will reduce total heat load on and in your home. The result will be more comfort during the day and quicker cooling at night.*

*Architectural designs of today allow for a lot of natural light inside and therefore use a lot of glass in construction. Large areas of glass which are exposed to the sun's rays will mean heating of internal areas.

Installation of a **Walkway Awning** at any location will not only provide protection from weather but is a great medium for advertising. Expose your corporate colours and logo and make your location stand out from the rest. Canopies over windows and doors can also be backlit (illuminated), with sign writing to promote your business day and night while also providing protection from the elements.

See-through fabrics allow clear vision, but block up to 90% of sun.

Fashion line

FABRIC AWNINGS

Our canopies are made of extruded aluminium frame, (which can be powder coated), and are shaped by a computerised bender. They are custom made to size, and the designs can be a standard shape or totally unique to blend with any type of architectural design. A wide range of fabrics, including waterproof are available. Canopies can be mounted over windows or doorways of homes, shops and restaurants and can also be made as backlit (illuminated) with sign writing to promote your business.

MINUETTE PATIO COVER

Minuette is a new concept for the domestic and commercial environment. An unobtrusive modern design, Minuette combines elegance with practicality.

It is manufactured from extruded aluminium framing and using the latest fabrics and fashion colours. Minuette will enhance home

or commercial areas and add that touch of class.

Create a cool, shady outdoor area over a terrace or patio by extending a **Folding Arm Awning**. When not required, fabricawning will roll discreetly out of sight, leaving no unsightly structure. Operation is by gear box with removable crank, or they may be motorised by Somfy motors with the option of a remote control, automatic sun, wind or time controllers. With the option of adjustable pitch optimum sun and rain protection is achieved.

CLEAR PVC CANVAS AWNINGS

are ideal to roll down to block out harsh winds but still have your view. Clear PVC is also available in lined style. Clear PVC awnings can be operated by cord or geared operation. Ideal for home entertainment areas or restaurant areas.
